

K2 Medical Systems

K2MS Athena Roadshow

K2MS Athena is the first and only full Maternity EPR System available in the UK. K2MS Athena is one complete system and spans the whole maternity journey from: Community Booking, Community Antenatal: Hospital Clinics; Helpline Calls and Triage; Antenatal Inpatient and Day Cases Labour & Delivery; Hospital and Community Postnatal Care. There are no paper records at all. Mothers access their own records via the smart phone.

K2MS Athena can help your service meet the following external demands...

- ❖ **Qualification for 10% CNST Discount**
- ❖ **Saving Baby Lives Care Bundle**
- ❖ **Personal Health Records (PHRs) for maternity**
- ❖ **Maternity Data Set (MDS) and Payment by Results (PbR) reporting**
- ❖ **MBRRACE-UK Perinatal Enquiry recommendations**

We would like to invite you and your colleagues to see how the K2MS Athena system works, how it can help meet external requirements and explain the benefits that implementation and use of the system could bring.

The roadshow will cover the following areas...

Functionality Demonstrations

Learn how K2MS Athena meets your maternity service requirements...
