

الجمعية السعودية لأمراض النساء والولادة Saudi Society of Obstetrics & Gynecology

1-12-2018

To: T2 Experts Health Information Management Systems LLC

Thank you for your communication to review the K2 Fetal Monitoring & Perinatal Training Program.

This program has been reviewed and recommended by The Saudi Society of Obstetrics and Gynaecology as detailed below with future recommendations.

Saudi Society of Obstetrics and Gynaecology recommendations:

A. Enriching your program with these topics to match Saudi 2030 vision in safe birth module:

1. Maternal Early Warning System and rapid Responses in Maternal Medical Care
2. Sepsis: • Pathophysiology of sepsis • Supportive management • Investigations and treatment
3. Embolism: • Recognize the features of pulmonary & amniotic fluid embolism and suspect the early diagnosis • Describe the treatment of suspected amniotic fluid and pulmonary embolism.

B. Obtain Saudi commission for health specialties CPD accreditation to gain CME hours. We easily calculated more than 45 hours through touring in the website.

K2 Fetal Monitoring & Perinatal Training Program

The K2 Fetal Monitoring & Perinatal Training Program is globally recognized as the Gold Standard of International Training. It supports the most current best scientific evidence-based practice & is continually updated.
