

## Hatta Hospital

---

Hatta Hospital, a multi-disciplinary hospital with 123 beds, is located in the heart of Hatta. The facility is an addition to DHA's network of hospitals and health centers that aims to establish a health care sector for people in Dubai.

Located in the scenic and soothing environment, combining fertile plains, solid mountains, give it a natural, invigorative touch. Healthcare today is a holistic experience. As a quality care facility, Hatta Hospital seeks to address every aspect of a person's well-being.

The modern two-story health facility occupies an area of 10,430 square meters. Since the areas adjacent to the city of Hatta are home to 40,000 residents, most of the patients come from nearby villages.

Hatta Hospital has received international accreditation from the Joint Commission International (JCI) and joins a list of DHA facilities that received the accreditation.

JCI is an organization which works to improve patient safety and quality of health care in the international community by offering education, publications, advisory services, and international accreditation and certification.

Hatta Hospital CEO Dr Saif Al Bedwawi commented that the implementation of the K2 Fetal Monitoring & Perinatal Training System at Hatta Hospital demonstrated commitment to further enhance patient care and satisfaction resulting in an improved patient journey for expectant mothers and families.

Trish Kennedy and Tracey Rawnsley Directors of T2 Experts Health Information Management LLC and Sole Exclusive Agents for K2 MS UK in the UAE/MENA Region; are very excited to be working with the CEO Dr Saif Al Bedwawi and his Team towards the implementation and support of the CME Accredited K2 Training Program at Hatta Hospital.
